

Andreas S Jensen: DISTURBED

Album release date: September 15th

(Current single is: Only Die Once - released September 8th)

Danish born, London-based singer-songwriter and musician Andreas S Jensen's debut album consists of 10 well crafted timeless classics, and a high standard continues throughout the album.

He writes catchy, alternative pop songs mentioning inspirations from artists like: David Bowie, Tom Petty, Elliot Smith, Jeff Buckley, Johnny Cash, Lou Reed, Elvis Costello and The Zombies....

Andreas has written, produced and remixed songs for artists like; Sam & The Womp, Armand Van Helden, Kevin Lyttle, Nerina Pallot and Vybz Kartel, and has sold close to a million copies of his songs worldwide.

Honing the best of Scandie melodic approach with British indie sensibilities, **DISTURBED** is playfully genre-mixing and journeys through Singer-Songwriter Pop, over Country, Indie Rock, and Electronics to 70'ish ballads, and Brecht style cabaret story telling.

Andreas doesn't seem too worried about being "cool" or "current". All he seems to care about is expressing what he feels and being emotionally true to the music he writes, and all this somehow transcends into high quality radio friendly music.

Andreas' singles **Take My Heart And Go** and **Trust Is My Anchor** was both supported by BBC 6 Music's Tom Robinson while the latter was featured on over 80 other stations, blogs and online magazines.

"Andreas has that knack for creating the simplest of acoustic guitar songs and turning them into something truly special, something that feels as though it matters. There are elements of Peter Gabriel or early REM here (although he has a better voice), but also that way of tapping into your emotions that I've only seen with Jeff (and oddly Tim) Buckley, Roger Chapman in family or even Christy Moore in Planxty. Not tonally, but the feeling and the effect he manages to produce, it is quite profound." - Guitar Quarterly

"I just love this guy's style, his work is an effortless listen for me. The lyrics are genius "you only die once, make it a good one" just brilliant! Shades of Peter Gabriel here who was one of my early heroes, another top quality piece of music, great production too!

- Chris Straw, Bauer Radio Producer

"Disturbed is the best album I have heard in a long time. Great voice, consistent quality throughout. Studio production first class. Lyrics can be heard. Every track tells a story. Best of all, EVERY song develops...So many songs today feel as if they should be going somewhere, but don't. Altogether, a great album. Peter Haynes, www.wrfn1025.co.uk

Andreas also works as a session/live musician for the infamous UK drum'n'bass/reggae act dub Pistols.
